# It's KEARNEY EQUIPMENT

## Engineered to do the Job Better!

**TRIP-O-LINK FUSE CUTOUT**

Rating 5,000 to 15,000 Volts — 50-100 Amperes. Single shot provides positive low cost insurance against transformer burnout, and needless circuit interruptions. An original Kearney design.

**TRIP-O-LINK TRIP SAVER CUTOUT**
**2 Shot Reclosing Type**

Rating 5,000 to 15,000 Volts — 50 Amperes. Automatically recloses the interrupted circuit through the reserve fuse — restores service and eliminates service trips.

**TRIP OUT FUSE CUTOUT**

Rating 5,000 to 69,000 Volts — 100-200 Amperes. A rugged, heavy duty fuse cutout built to interrupt the high short circuit currents of modern day distribution and transmission lines.

**TRIP SAVER FUSE CUTOUT**

Rating 5,000 to 34,500 Volts — 100-200 Amperes. Positive continuous sequence of action resets automatically, eliminates costly service interruptions.

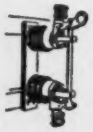
**TRIP-O-MATIC FUSE CUTOUT**

Rating 5,000 to 7,500 Volts — 50-100 Amperes. Isolates service interruptions and protects expensive distributing equipment. Simplicity of the tripping mechanism makes it possible to clear either low overloads or heavy short circuits with equal facility.

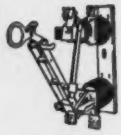
**KEARNEY FUSE LINKS FOR BETTER FUSING COORDINATION**

In the manufacturing process of Kearney Fuse Links, a continuous series of tests and inspections by experienced engineers results in a high degree of accuracy and uniformity.

**HOOK-OPERATED DISCONNECT SWITCH**



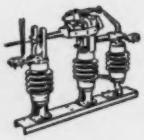
Ratings 7,500 to 69,000 Volts — 200-600 Amperes. Made of field tested material of the highest quality. Kearney Hook-Operated Disconnect Switches offer you trouble-free performance for isolating substation equipment and feeder lines.



**REGULATOR BY-PASS DISCONNECT SWITCH**

Rating 7,500 to 15,000 Volts — 200-600 Amperes. With Kearney Regulator By-Pass Switches safe switching sequence is automatic, eliminating the hazards of opening the wrong disconnect; takes care of four distinct switching operations in safe, logical order.

**GROUP-OPERATED DISCONNECT SWITCH**



Rating 7,500 to 69,000 Volts—200-400-600 Amperes. Available in Tilting and Rotating Insulator type—adaptable to single or multiple pole application. Proven to be long-lasting and dependable.

**Ultra High Pressure Disconnect Switch**

Available in 600 Amps., all standard ratings 7.5 to 69 KV inclusive. The low-operating temperature of this revolutionary design means longer service life. Write for bulletin 6-25 for more detailed information.

**Reduce Your Connector Cost By 50% With The NEW Kearney SQUEEZON**

The Kearney Squeezon is a completely new type connector that eliminates contact corrosion. Features higher electrical and mechanical efficiency. Write today for the big 8-page booklet with complete information.

**NEW Kearney AIRSEAL**
**For Greater Permanent Protection to ALL Connections**

Kearney AIRSEAL is a pliable, high-dielectric compound, chemically inert, which when applied to connections forms a permanent seal against high resistance contamination. Write for complete information and prices.

**For Power Factor Correction or Voltage Improvement—Use Kearney SHUNT CAPACITORS**

Kearney Shunt Capacitors are designed to fit all standard mounting racks—they are made with extra heavy wet process porcelain bushings and a welded sheet steel case. Kearney Capacitors are packed in a special protective shipping rack that guarantees factory fresh receipt and easier installation.

# BUSS FUSES

**FUSETRON** dual-element fuses. Eliminate needless blowing of circuit fuses. Protect motors against burnout from overloads or single phasing. Reduce heating in panels and switches. Give thermal protection to panels and switches. Save on service and maintenance costs. In all sizes 1/10 amp. up—in 125, 250 and 600 volt types. Fit regular fuse holders.

**BUSS Fustats.** (Type "S" fuses) Operate like Fusetron fuses. Make SAFE protection REMAIN SAFE. 3/10 to 30 amp. sizes. Fit plug fuse holders thru use of inexpensive adapter.

**BUSS Super-Lag Fuses.** Give a freedom from needless blows not possible with any other renewable fuse. Greatly reduce out-of-service losses and fuse bills.

**BUSS One-Time Fuses.** Receive same engineering care in manufacture as all products bearing BUSS trade mark. Safe and dependable under all conditions.

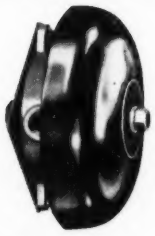
# FEDERAL industrial signals SOUND in every sense of the word!

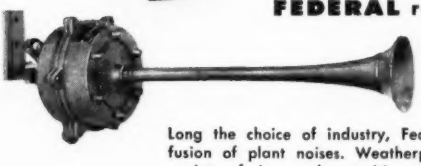


Choose Federal for heavy-duty, dependable signals that assure distinctive action-producing SOUND without fail when you need it . . . be assured your choice is SOUND because Federal — oldest and largest signal manufacturer — makes the best signals, precision-designed to do the job you set for them. Whatever your emergency or signal needs, you'll find exactly the signal you need in Federal's complete selection.

**FEDERAL heavy duty electric bells**

These rugged bells come in vibrating, single stroke or underdome type. They are weatherproof, non-corrodible and will operate in any position.

**FEDERAL resonating horns**



Superior tone, penetration and power make this horn an exceptional signal for coding and for all signalling purposes in extremely noisy locations. Weatherproof and watertight.

**FEDERAL super-powered sirens**

Long the choice of industry, Federal's distinctive wail penetrates through the confusion of plant noises. Weatherproofed housing is mountable at any angle. Wide variety of sizes and capacities are offered.

# Crapo Galvanized Products

**Crapo STEEL STRAND**

There is a size and grade of Crapo Galvanized Steel Strand for every practical need. Galvanized by the famous Crapo Process and furnished in the following grades: Siemens-Martin, High Strength, Extra High Strength, Commercial Grade (Extra Galvanized), Specification (Utilities) Grade 7-wire and Utilities Grade 3-wire Strand. All standard sizes.

•

**Crapo STEEL Conductors**

Crapo HTC-130 and Crapo HTC-80 Stranded (3-wire) Conductors provide a practical combination of physical properties and electrical efficiency for the overhead transmission and distribution of power. Make possible long spans with flat sags and greater ground clearances, reduce the number of pole structures required, save material and man-hours.

•

**PREFORMED ARMOR RODS**

Preformed Armor Rods provide a dependable, economical way to reinforce and protect overhead conductors and static wire at the point of and in the region of the support. Minimize wear and chafing; tend to absorb and dissipate vibration; protect against arcing and flashovers; afford excellent holding power against slippage. Manufactured in galvanized steel, aluminum alloy, copper weld or bronze.

## SOLDERLESS WIRE CONNECTORS

Bolt and clamping jaw cold forged from same material as your copper conductors, hence no loose connections due to different coefficients of expansion. By using copper in these parts and eliminating the use of hard alloy, low conductivity metals, Matthews Connectors assure maximum conductivity and will not indent, nick or damage your conductors. Full engagement of threads and close tolerances of all parts assure strength. All connectors are given 100% inspection. Write for Bulletin 206 for complete information on all types of Matthews Connectors.

## MATTHEWS CUTOUTS

A complete line of cutouts in Enclosed and Open Types both Dropout and Non-Dropout styles. Enclosed types rated 50 to 200 amps. 5 and 7.5 KV. Open types rated 100 and 200 amps. 5, 7.5, 15 and 23 KV. Sturdily constructed, all current carrying parts of at least 85% copper content material. Fully described in Bulletins 102-B, 103-B and 103-S.

**MANUFACTURERS OF**

Cutouts, Disconnecting Switches, Fuse Links, Wire Connectors, Guy Guards and many other pole line construction materials and tools.

# Gives the Industrial Lighting Equipment Buyer the answers to every question of Quality...

## new Questions and Answers booklet explains why it pays to buy RLM-Labeled incandescent and fluorescent Lighting Units.

Electrical Contractor: "This RLM Booklet tells why I recommend RLM-labeled units."

This new, pocket-size RLM booklet is now being distributed by progressive contractors, architects, lighting engineers and others who recommend lighting for industry. They leave these booklets on the desks of their customers and prospects because they want to be sure the buyer understands that quality lighting equipment is *worth more* because it *costs less* in the long run.

This 8-page booklet answers the most frequently raised questions concerning quality incandescent and fluorescent lighting equipment and the RLM Label. It tells the buyer what he wants to know about the RLM Standards Institute, how the minimum standards of quality for construction and performance are established and how conformance to these standards is secured. Further it explains how the RLM Label provides assurance, not only of quality but of the uniformity of that quality in each and every individual lighting unit.

Included also is a list of the 26 illuminating engineering factors which are a part of every RLM standard specification. It is because of these factors that buyers obtain from lighting units bearing the RLM Label the assurance of better performance, long life, sustained lighting efficiency and economical operation.

Copies of the Booklet and 48-page Specifications Book available from any of the 28 manufacturers of RLM Lighting Units or by writing the RLM STANDARDS INSTITUTE, Suite 815, 326 W. Madison Street, Chicago 6, Ill.

## THE RELIANCE LINE OF TIME SWITCHES . . .

• Reliable devices for automatically controlling circuits where current is to be turned on and off at predetermined times daily. Fully guaranteed by the manufacturer and listed by the Underwriters' Laboratories.

M2 Illustrated

## "BADGER" Synchronous

This model is specifically a heavy duty time switch designed and built to meet the demand for a reasonably priced switch with a capacity great enough to meet a wide variety of requirements. Extra-heavy gears, a slow-speed synchronous motor, and heavy copper-to-copper "floating" contacts—all help to make the "Badger" a better-built switch for long-lasting, accurate control.

All types are single throw (straight ON and OFF)

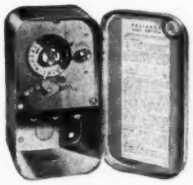
| Type | Poles | Switch Capacity | Case |
|---|---|---|---|
| M1 | 1 | 50 A. at 125 V. | Sheet Steel |
| M2 | 2 | 50 A. at 125/250 V. | Sheet Steel |
| RM | 1 | 50 A. at 125 V. | Cast Aluminum |
| RM5 | 2 | 50 A. at 125/250 V. | Cast Aluminum |

W-22 Illustrated

## "MODEL W" Synchronous

An extremely simple, compact and dependable time switch which with only three types, covers practically every time switch requirement. Has large silver contacts and heavy-duty self-starting motor. Type W-33 controls two separate circuits independently or simultaneously by merely setting the trip hands for the desired schedule of operation. Model W case is of 20 gauge steel finished in hammerloid enamel.

| Type | Poles | Throw | Switch Capacity |
|---|---|---|---|
| W-11 | 1 | Single Throw | 30 A. at 125 V. |
| W-22 | 2 | Single Throw | 30 A. at 125/250 V. |
| W-33 | 2 | Two Circuit | 30 A. at 125/250 V. |



Type 401

## "MODEL 400" Synchronous

A simplified, smaller, lower cost time switch, especially suitable for automatic control of circuits up to 2500 watts, such as small window lighting installations, signs, oil burners, air conditioning, etc. Contacts are silver-to-silver. Timing element is driven with precision gear train and vernier time set. Numbered terminals are provided for all connections. Case is one-piece deep drawn steel with hinged cover.

| Type | Poles | Throw | Switch Capacity |
|---|---|---|---|
| 401 | 1 | Single Throw | 20 A. at 125 V. |

Astronomic dial available on types W-11 and W-22.

Prevent Costly Burnouts

with

VAP-OIL-TITE

FITTINGS

Fouled contacts cause costly burnouts and down-time. Use VAP-OIL-TITE FITTINGS with Plastic Covered Flexible Metallic Conduit for Sure Sealing of wiring on oil, water, dust and vapor tite equipment.

VAP-OIL-TITE'S exclusive threaded bushing not only insures positive grounding but also makes fitting easier to install because a collar covers metal edges making burring unnecessary. Furnished in numerous types with body sizes from 3/8" to 2". Write or wire today for bulletin #MT-104 giving types, sizes and prices.

# SOAPSTONE OCTAGONAL CONDUIT

**Permanent Circuit Protection for Underground Systems**

**SOAPSTONE conduit has been used for 25 years by utilities and by electric and underground contractors for power, communication and signal circuits where concrete-encased systems are specified. Newly introduced octagonal shape speeds construction, lowers costs.**

**Smooth bore protects cable sheath and makes long pulls easy. Dissipates cable heat rapidly. Mineral composition makes it chemically and electrically inert.**

**Complete range of sizes from 2" to 5". Spacers, bell-ends, reducers and adapters available to suit all normal and special situations.**

**Trench-side delivery to most of California, convenient lengths for fast, easy "one-man" handling in the field, simple collar-type coupling that requires no special tools to apply and prices no greater than inferior conduit assure lowest installed costs with SOAPSTONE.**

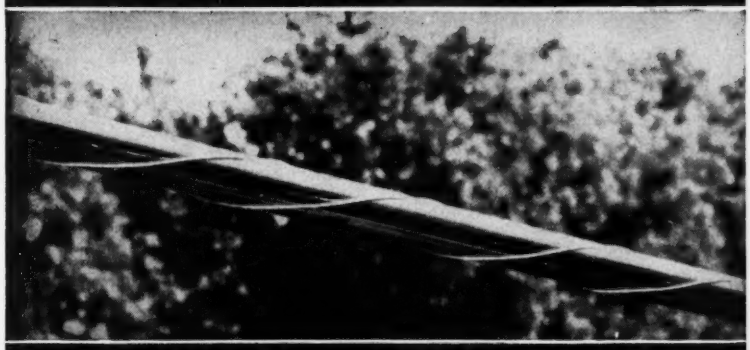
**SPIN CABLE LIKE THIS...**



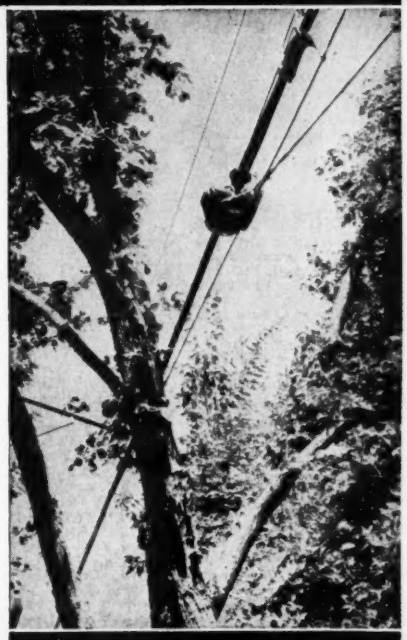
**THROUGH TREE-CONGESTED AREAS AT MUCH LESS COST...**

You can save man-hours of wood-cutting and customer complaints when you spin cable through tree-congested areas. What is more, spun cable costs much less to install than pre-assembled cable. Spun cable is so compact that it saves valuable space wherever congestion is a problem.

You save splices and installation labor, because light weight single conductor cables may be spun in lengths three times as long as pre-assembled cables.

You reduce your cable inventories, because 1/c, 2/c and 3/c cables can be spun in the field as required.

Add to these benefits the extra margin of protection against storm damage... and you readily understand why there is a marked trend to cable spinning in the power field.



**with NEALE Model "K"**

**HOW IT WORKS**

Drum rotates when its two friction drive wheels respond to pulling of wire. Drum revolves once when 13" of wire is pulled —regardless of condition of strand. Drum carries two spools of wire, each spirals 13" giving support every 6½". Magnesium castings used wherever possible for lightness and strength. Weight: only 36 lbs. Overall length: 18½".

HERE IS HOW TO REDUCE OPERATING COSTS

SAFE-T-SEAL fortifies usual insulation and impedes ionization. It is entirely different in the electrical operations. PROVEN "on the job" in varied industries that it at least DOUBLES the previous LIFE of electrical equipment. SAFE-T-SEAL is suitable for practically all types and sizes of everything electrical. Easy to use and INEXPENSIVE in applied cost. It definitely will increase production and reduce maintenance costs. FACTS free. Write to:

# FARADAY ®

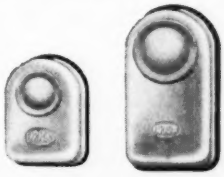
## the Emblem of Quality since 1875

## Electrical Signals and Systems

**UNIPACT SIGNALS.** Need one—or a series of bells, chimes, buzzers or horns? You can have your choice, because these various types of signals are interchangeable; no new wiring is needed. UNI-PACT Signals meet noise level requirements with tailor-made results.

**FARADAY FIRE SYSTEMS.** FARADAY Fire Alarms provide *extra* protection. A wide variety of systems to meet all fire warning requirements. Models available for surface or semi-flush installations. FARADAY is known for dependability throughout the industry.

**FARADAY CLOCKS.** Can be furnished for remote control by master units, or for direct-operating installations. FARADAY models are supplied for either surface or flush mounting, in 10, 12, 15 and 18 inch sizes. Easy-to read dials are white, with bold Arabic numerals.



**FARADAY BELLS AND BUZZERS.** A complete selection of both bells and buzzers for homes, offices, hotels and apartment buildings. Attractive appearance . . . long-lasting. Years of research and production experience make FARADAY signals the outstanding brand—always dependable.

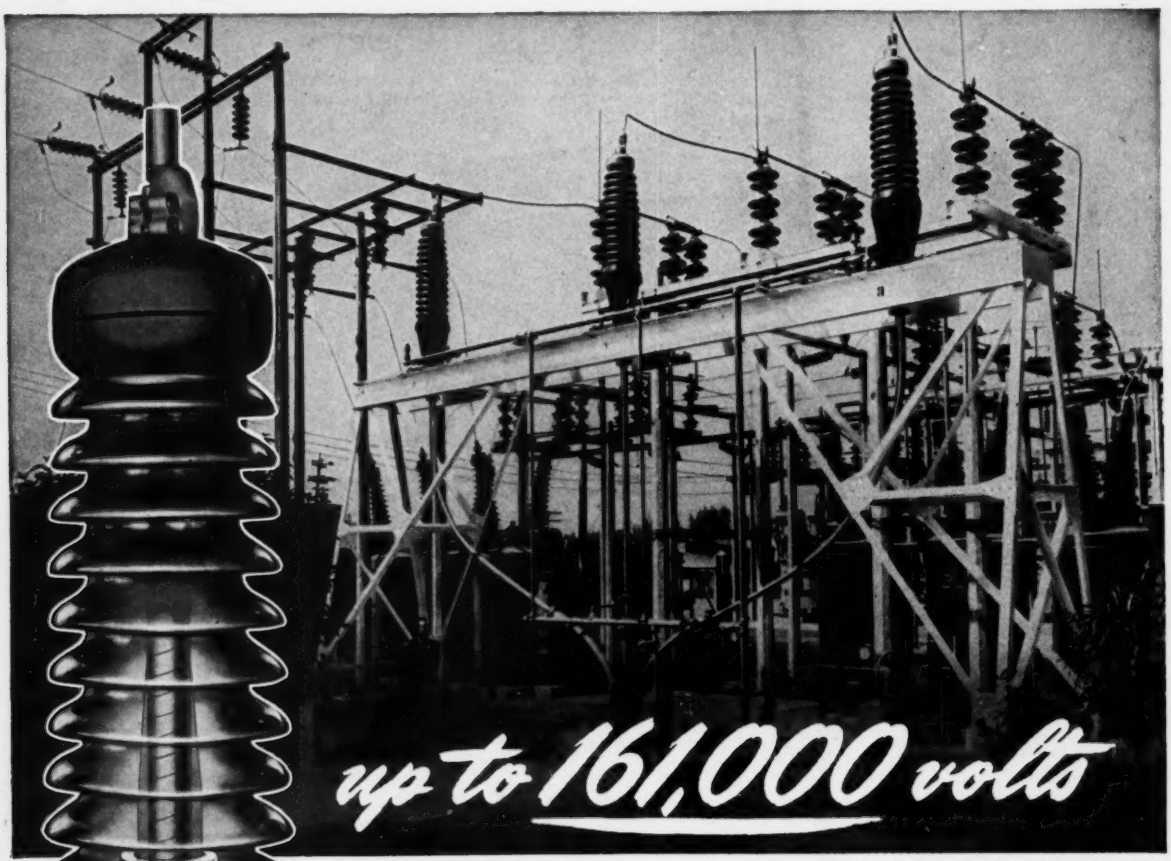
MAYDWELL & HARTZELL
INCORPORATED



# HIGH PRESSURE...OIL FILLED
# POTHEADS by G&W

**Proper treatment of mechanical and electrical stresses permit this simple G & W design. Full 200 pound pipe line oil pressure is retained by the relatively small bore porcelain shell. Top and bottom fittings are fabricated, nonmagnetic, stainless steel —sealed by a minimum of gasketed joints.**

**Stress relief cone, supplemented by porcelain stress control tube, makes efficient use of the internal diameter and length of porcelain shell—and reduces the amount of installation labor.**

**Phantom view shows G & W type "ATA" 161 kv. pothead. Background installation shows G & W type "ATA" 115 kv. potheads.**

***For further data, drawings and prices, send us a complete description of your cable.***

***G & W is now in a position to furnish Cable Joints, Oil Reservoirs, and accessories for oil and gas filled cables up to 161 Kv.***
